EDUCATION

Pomona College

Claremont, California

Bachelor of Arts in Computer Science

Aug 2021 – Dec 2024

- **Academic All-American Athlete**, 2022-2024 maintaining a 3.4 or above.
- **Relevant Courses:** Data Structures Adv Programming, Intro to Languages and Theory, Machine Learning w/ Neural Signal, Machine Learning, Game Engine Programming, Big Data, Managing Complex Systems, Computer Systems, Algorithms, Mobile Robotics, Special Topics in CS.
- **Extracurricular:** Taiko Club(Treasurer), D-III Varsity Football Athlete, Pomona-ai project member: NXT Play

TECHNICAL SKILLS

Languages: Java, Python, SQL(pSQL,MySQL, SQLite3), Rust, Shell (Unix)

Developer Tools: Git, Docker, VS Code, PyCharm, Tmux

Software: Overleaf, Excel, Notion, Github, New Relic, Jira

Packages: Pandas, NumPy, PyTorch, TensorFlow, SqlAlchemy,Flask

PROJECTS

Fantasy Football Helper | *Python, Flask, Weaviate, Git, Docker, ESPN API, OpenAI API* Nov 2024 – Present

- Used Weaviate to store and retrieve football-related articles, enhancing context for specific players.
- Used the ESPN Fantasy API to fetch real-time player statistics, providing users with relevant performance metrics, attached to the individual's specific league

CRUD Twitter Clone Web-App | *Python, Flask, SqlAlchemy, Git, Shell, Docker,pSQL* April 2024 – May 2024

- Developed a full-stack/end-to-end CRUD application with Nginx, Flask, and PostgreSQL, deploying with Docker for consistency and scalability.
- Enhanced PostgreSQL performance through optimized indexes and queries, achieving rapid data retrieval (Avg 500ms) from databases exceeding 30 million rows.

p-NXT Play; Football AI Team | *Python, Yolov8, TensorFlow, Pandas, Google Co-Lab* February 2024 – May 2024

- Enhanced a football offense formation detection model by refining data pre-processing and cleaning techniques, boosting accuracy by 30% over the previous model.
- Led the overhaul of data processing methods to optimize performance for predictive modeling.

Deployment of Photo Distribution Site | *AWS-Ec2, pKeep, PostGres, Git, Tmux* Jan 2024 – May 2024

- Worked Collaboratively with a small team to deploy, monitor, and scale a Java-based web application Service.
- Implemented scheduling, monitoring, service management, and CI/CD techniques to optimize system efficiency, proactively identify and address issues, and ensure continuous application uptime, achieving 97% upkeep.

Various Machine Learning Models | *Java, Git* Sep 2023 – Dec 2023

- Defined individual classes for machine learning models w/o the use of premade libraries or packages.
- Created a Class that can read parse through CSV or TXT transforming data into trainable and testable formats.
- Models/techniques made: Naive Bayes, Perceptron, Decision Tree, One-vs-All (OvA), One-vs-One (OvO), Neural Networks, Gradient Descent, and Random Forest.

EXPERIENCE

Data Analyst (Contract)

February 2025 – Present

Special Olympics

Remote

- Analyzed Survey data to identify regional trends, leadership gaps, and actionable insight.
- Delivered organized and detailed cut-ups and data models to clearly communicate findings.

Computer Science Mentor/TA

Jan, 2024 – Dec 2024

Pomona, College

Claremont, CA

- Providing mentorship to younger students during labs and mentor sessions, focusing on Java-based instruction in data structures, object-oriented programming (OOP), and algorithms.

*Note: This resume highlights projects due to my early industry stage. For a comprehensive list of job experiences, please visit my **LinkedIn***
